SUMMARY

Product Designer focused on solving complex problems and creating digital experiences that work for both users and the business. Brings a structured approach to understanding problems, making informed design decisions, and turning them into clear, scalable solutions with measurable impact.

EXPERIENCE

IMMENSE.CO Jul 2025 – Aug 2025

UX Design Intern | Remote, India

- **Ad-Din.ca redesign.** Redesigned the Canadian community SaaS platform for schools, masjids, and member services, from user research and journey mapping through wireframes and high-fidelity UI. **Reduced task completion time by 22%** and **increased user satisfaction by 30%**.
- **Design system.** Built a scalable Figma component library with design tokens and interaction states. **Reduced UI inconsistencies by 40%** and gave engineering a consistent source for implementation and handoff.
- **Core product flows.** Improved information architecture and interaction design across 3+ flows using progressive disclosure and cognitive-load principles; delivered WCAG-accessible, production-ready screens with product, engineering, and QA.

PROJECTS

Virgio 2025 | Shipped

Checkout Migration, Authentication & Design System • **0→1 seller experience.** Designed ZERO's seller-listing experience for a thrift platform, creating a supply flow intended to reduce inventory risk and support a non-owned supply model.

- **Checkout migration.** Moved checkout from Shopify to an in-house system, contributing to a **2.68% conversion lift** and a **25.7% reduction in time-to-convert**.
- **Authentication redesign.** Redesigned login after the Kwikpass-to-Shiprocket migration, resolving identity-mapping errors and improving **login success by 20%**.
- **Design system and experimentation.** Rebuilt the design system with scalable variables and reusable components to reduce duplication and improve handoff maintainability. Ran structured A/B tests on the Add-to-Bag modal to improve cart-building behaviour and average order value.
- **Research into purchase behaviour.** Conducted on-ground store visits and translated observations of offline shopping behaviour into insights for the team's PDP conversion strategy.

Rentickle Shipped

Mobile Checkout Experience Redesign • **Checkout diagnosis.** Analysed a **9.8% checkout completion rate** and a 6m 22s average mobile checkout using heatmaps, scroll maps, rage-click data, and interviews with 10 customers (6 completed, 4 abandoned).

- **Key insight and redesign.** Found that users struggled to distinguish today's payment from monthly rent; the KYC upload field attracted the most rage clicks, while a billing-address step applied to everyone but served ~2% of orders. Simplified the 6-step journey into a **3-step, single-page checkout** with a Pay Today vs. Monthly Pay breakdown, shipping-address default, and inline KYC guidance.
- **Reported results and scope.** Checkout time fell from **6m 22s to 3m 42s (-42%)**; KYC verification drop-off decreased **48%**; checkout completion increased **12%**. Scoped V1 with engineering, deferring three features due to backend and timeline constraints.

Payment & Protection Decisions

- **Research and insight.** Mapped credit-review and damage-settlement workflows and benchmarked CityFurnish, Rentomojo, Furlenco, and Fabrento. Identified that advance-payment and protection decisions surfaced too late, contributing to 24–48-hour manual reviews, unexpected deposit deductions, and **55% of high-risk users not applying for advance payment**.
- **Design response.** Moved decisions earlier through an advance-payment selector on the PDP, a cart-based protection plan with covered and excluded damage terms, and an item-level edit drawer for tenure, care plan, and payment plan.
- **Reported outcomes.** Approximately **2× more confirmed orders**, **82% Protection Plan adoption**, and **9% Advance Plan adoption**, contributing to higher total order revenue.

SKILLS

Design: UX Research, User Interviews, Usability Testing, A/B Testing, Competitive Analysis, UX Audits, Journey Mapping, User Flows, Information Architecture, Wireframing, Prototyping, Design Systems, Accessibility (WCAG), Design Handoff

Tools: Figma, Framer, Miro, Adobe Illustrator, Adobe Photoshop, Adobe After Effects, Spline 3D, Jitter, Lottie, Rive

AI Workflow: Claude, ChatGPT, Cursor AI, Lovable AI, Figma Make

CERTIFICATIONS

Google UX Design Professional Certificate | Coursera Mar 2024 – Jul 2024

EDUCATION

CBZ Nov 2020 – Nov 2023

Rani Channamma University, Belagavi
