AMIT DESAI

LinkedIn | Portfolio | itsdesaiamit@gmail.com | +91 80881 62663 | Bengaluru, India

SUMMARY

Product Designer with **1.2 years of combined internship experience** shipping fintech and commerce experiences for high-stakes moments — checkout, payments, onboarding — backed by real user research and systems-level thinking. At Virgio, led a **Shopify-to-in-house checkout migration** that lifted conversion **+2.68%** and cut time-to-convert **25.7%**. At HDFC Bank, benchmarked **15+ banking platforms** to redesign a commercial cards portal around the one gap competitors kept missing. At Immense.co, rebuilt a community SaaS platform end-to-end, cutting task completion time **22%**. AI-native workflow — Figma, Cursor AI, Lovable AI, and Claude as daily tools, not novelties.

EXPERIENCE

VIRGIO | Bangalore Jul 2025 – Feb 2026

Product Design Intern

- **Led 0→1 design** for ZERO's seller listing experience — a thrift-platform supply flow built to eliminate inventory risk and enable scalable, non-owned supply.
- **Migrated checkout from Shopify to an in-house system**, lifting conversion **+2.68%** and cutting time-to-convert **25.7%**.
- **Rebuilt the login and authentication flow** following a Kwikpass-to-Shiprocket migration, resolving identity-mapping errors and raising login success **+20%**.
- **Rebuilt the design system from scratch**, standardizing components on a scalable variable setup to cut duplication and improve handoff maintainability.
- **Ran structured A/B experiments** on the Add-to-Bag modal to optimize cart-building behavior and lift average order value.
- Conducted **on-ground store visits** to observe offline shopping behavior firsthand, synthesizing findings into the team's PDP conversion strategy.

HDFC BANK May 2025 – Jul 2025

UX Design Intern

- Designed interfaces for both the **B2C Payment Gateway** and **B2B Commercial Cards Portal**, benchmarking **15+ banking platforms** (SBI, Amex, HSBC, Citi, ICICI, BoA, Barclays, CRED, and more).
- Synthesized user interviews and journey maps into research reports that surfaced **24/7 support** — not a missing feature — as the single largest gap against competitor offerings.
- Translated research into **interactive prototypes**, improving usability and feature functionality across both consumer and enterprise flows.

IMMENSE.CO | Remote, India Jan 2025 – Apr 2025

Product Design Intern

- **Redesigned Ad-Din.ca end-to-end** — research, journey mapping, wireframes to high-fidelity UI — for a Canadian community SaaS platform managing schools, masjids, and member services. Cut task completion time **22%**, raised user satisfaction **30%**.
- **Built a scalable Figma design system** — components, tokens, full interaction states — reducing UI inconsistencies **40%** and giving engineering a single source of truth.
- Improved IA and interaction patterns across **3+ core flows** using progressive disclosure and cognitive-load principles; delivered **WCAG-accessible**, production-ready screens with PMs, engineers, and QA.

SKILLS

Design: Product Design, UX Research, Interaction Design, Visual Design, Wireframing, Prototyping, Design Systems, User Flows, Usability Testing, Information Architecture, Motion Design

Tools: Figma, Framer, Spline 3D, Adobe Illustrator, Adobe Photoshop, Jitter, Lottie, Cursor AI, Lovable AI, Claude, Figma Make

CERTIFICATIONS

Google UX Design Professional Certificate | Coursera Mar 2024 – Jul 2024

EDUCATION

CBZ — Rani Channamma University, Belagavi Jan 2021 – Oct 2023
